## AGENDA

### Indiana Boiler and Pressure Vessel Rules Board Meeting

Conference Center – Conference Room C – June 7, 2017 – 10:00 AM

1. Call Meeting to Order
  - a. Introduction – Board Members/Representatives and Audience/Gallery
2. Approval of Agenda (Additions/Amendments)
3.
  - a. Approval of Minutes from March 1, 2017, meeting
  - b. Approval of Minutes from May 3, 2017, meeting
4. Report of New Commissions issued since March 1, 2017
  - a. Luis Alvarez-Trinta Commission #2033 Hartford (HSBI&ICO)
  - b. Erica Schmechel Commission #2034 Hartford (HSBI&ICO)
  - c. Victor Casada Commission #2035 Zurich
  - d. Seth Wellspring Commission #2036 Chubb
5. Old Business
  - a. V160601 – Lake City Heat Treat Corporation  
No proponent was available for questions. Motion to table to the June meeting. Division will send letter to Lake City and instruct a state inspector to visit the location and advise Mr. William Davis, President of Lake City the variance will be denied in the June meeting if no response or a representative is not available at the June meeting to answer Rules Board questions.
  - b. V160201 – Monogram Foods Solutions, LLC  
No proponent was available for questions. Motion to table to the June meeting. Division will send letter to Monogram Foods and instruct a state inspector to visit the location and assign the Thermal Fluid Heater the referenced variance number, provide division an inspection report and advise Monogram to have available the updated calculations and representation at the June meeting. The variance will be denied in the June meeting if no response or a representative is not available at the June meeting.

- c. V170201-V170205 – Howe Military Academy  
Motion to table until the June meeting. Board request that a representative from Howe attend the June meeting to respond to questions. Questions include difference in ASME Section IV HG vs HLW installation requirements, over pressure protection relief valve, operating conditions and timing on replacement units. Division will send letter to Howe and instruct a state inspector to visit the location to assign the referenced variance numbers and obtain additional information, including nameplate information and pictures and advise Howe to have representation at the June meeting.

6. New Business

- a. V170301 – Valero Renewables – 200 Proof Cooler Heat Exchanger (RE Old Variance # V070315)

Change vessel maximum allowable working pressure from 75 to 110 psig.

7. Report on Updated Title 680

The Rules Board during the May 3, 2017, special meeting, approved the revised and final draft of Title 680 IAC.

8. Attached ASME Boiler and Pressure Vessel Code Section IV Code Case 2882 for your review and approval.

9. Report of Division

Since 2015, division lost the service of five field inspectors that retired, sought new employment, or promoted leaving the remaining four state inspectors with the task of servicing an additional forty counties. As Chief Inspector, I perform limited field inspections and assist in the training of state inspectors. As of April 30, 2017, there were 7,646 vessels listed as overdue for state inspection. 6,823 are in the forty counties not serviced regularly by state inspectors. Division hired two candidates without NB commissions; Wilbur Butcher in March and Mark Smith in April. Both candidates live in Porter County. The plan is to train these individuals within six months of their hiring date and have them ready to attend, complete and pass the NB Training Course in Columbus, OH. Upon receipt of the 2015 ASME code books (Section I, IV, V, VIII, IX) required by the NB, Roger Boillard will attend the next available NB Training Course. In the event of failure, the Director of Homeland Security approved the hiring of three commissioned inspectors to fill the vacancies at a starting salary of \$46,000.00.

Presently, there are sixteen authorized inspection agencies that inspect regulated vessels in Indiana. Our records indicate those companies are responsible and inspect over four thousand regulated vessels and have approximately five thousand overdue for inspection.

- Discussion on CSB Investigation into the Loy Lange Box Company Catastrophic Pressure Vessel Failure.

10. Next Scheduled Meeting (10 a.m., September 6, 2017, Conference Center Conference Rm 1)

11. Adjournment
